The 2014 remake of Robocop follows a story set up in the year 2028, where a multinational conglomerate OmniCorp. who is at the center of robot technology is wanting to bring their controversial cyborg-drone technology to the home front. They see a golden opportunity to do so when Alex Murphy (Joel Kinnaman) – a loving husband, father and good cop doing his best to stem the tide of crime and corruption in Detroit – is critically injured. OmniCorp. sees their chance to build a part-man, part-robot police officer. They envision a RoboCop in every city and billions more for their shareholders, but they never realised one thing: there is still a man inside the machine pursuing justice!
